- Auto voltage select
- 500mm print head conduit

### Options

- RS232 and RS485 interface
- Variable speed encoder
- Custom Software and print design
- 750mm print head conduit
- Portable stand
- Coloured inks
- UV inks

The *Sauven 6000 Remote* uses *High Speed Piezo Jet Technology* to create any characters, barcodes or graphics in an *Ultra High Resolution* format. Simply attach the Sauven printer to your production line and start printing.

### Ink cartridge

Not only does the printer use a black fast drying solvent based ink for easy jet control and dense black image, but the ink is contained in a unique push-fit replaceable cartridge. Simple and clean!

### Print your product

The standard software offers 6 character heights, up to 4 print lines, bar codes, and a selection of logos. Bespoke software can create any print design. Single or continuous repeating messages can be printed at up to 100 meters/min. Variable speed encoders or the auto-repeat function will give your required high resolution print. The computer interface allows for networking into a fully integrated packaging system, and control of the print layout and design.

### Sauven 6000 Remote

The printer is compact, with the control system, and ink cartridge in a single unit and a remote print head able to print vertically or horizontally. Pictorial keys give instant access to each programming function. Viewing or creating a message, entering a barcode or logo could not be easier.

- Glass, Bottles and Jars
- Metal cans
- Plastic containers
- Varnished packaging board
- Shrink wrap trays
- Pharmaceutical packaging
- Mailing and addressing
- Cheque cancelling
- Continuous web printing
